

We extend our heartfelt gratitude to our esteemed sponsors and partners whose unwavering support made the **29th Colloquium** possible. We invite you to explore the diverse offerings of our exhibitors during breaks, showcasing their exceptional products and services that enhance cybersecurity education.

Marquee & Academic Partner

Seattle University, located in the heart of the Pacific Northwest's thriving technology corridor, is a nationally recognized independent university known for its academic excellence, social justice leadership, and commitment to educating the whole person. With strong programs across science, engineering, business, law, and the humanities, the university fosters interdisciplinary collaboration and civic engagement. Its central location in Seattle provides students and faculty with meaningful connections to industry, government, and nonprofit sectors, making it a vibrant hub for innovation and public service.

Gold Sponsor

At Codio, we fuse computing education research with AI to deliver learning experiences that truly build job-ready skills. By combining evidence-based pedagogy, intelligent technology, and immersive design, we create a new standard of "better tech skills learning." The results speak for themselves: higher completion rates, increased time on task, stronger grade attainment, and learners who graduate with the confidence and capabilities today's workforce demands.

Contributor

The Master of Cybersecurity and Leadership (MCL) program at the University of Washington Tacoma equips professionals and military personnel with technical backgrounds to enhance their leadership and cybersecurity skills for career advancement. By integrating resources from the School of Engineering & Technology and the Milgard School of Business, the program fosters innovative solutions for information assurance and cybersecurity challenges, positioning graduates for success and entrepreneurial opportunities in Washington's cybersecurity landscape.
